

Klove is a wonderful encouragement to me in my Christian walk and I absolutely love the positive music and commentary.

I believe the local community would be greatly affected in a negative way if Klove went off the air and was replaced with another station.

I believe that the service Klove provides is in the public interest because it only provides positive and encouraging programming and there are no commercials advertising negative products. It is very rare today to find a radio station that is completely positive and it would be devastating to klove listeners if it was taken off the air. Thank you very much, Tony Maghakian
